

**NOTICE OF FINAL DECISION  
TO REISSUE A CORRECTIVE ACTION PERMIT  
DuPONT CHATTANOOGA PLANT**

The Tennessee Department of Environment and Conservation's (TDEC) Division of Solid Waste Management (DSWM) has made a final decision to reissue a hazardous waste management corrective action permit to E.I. DuPont de Nemours & Co. Inc. in Chattanooga, Tennessee; EPA Identification Number: TND 00 333 1766. The permit was issued on September 19, 2008, and shall remain in effect until September 19, 2018, unless continued, revoked and reissued, or terminated under applicable regulations. This action follows a 45-day public comment period, which ended on June 13, 2008. No comments were received from the public during this comment period. However, comments were received from DuPont and EPA and are addressed in the [Response to Comments](#).

The permit, TNHW-136, identifies known solid waste management units (SWMUs) and areas of concern (AOCs) at the DuPont Chattanooga Plant. The facility shall be required to investigate any release of hazardous waste or hazardous constituents pursuant to this permit, regardless of the time at which waste was placed in a unit, and to take appropriate corrective action for any such release. In addition to corrective action, under the conditions of this permit, DuPont will also be required to notify of imminent hazards; and as applicable, comply with the requirements developed under land disposal restrictions and organic air emission standards.

This permit is issued under Tennessee Code Annotated, Section 68-212-101 et seq., and Tennessee Rule Chapter 1200-1-11, Hazardous Waste Management.
